

Instructions how to upload custom theme to Mosaic

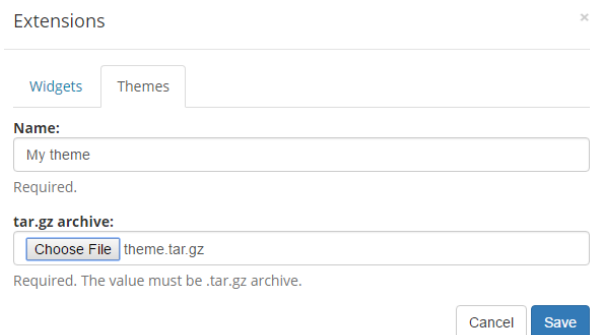

- 1) You should make style.css file. If you need it to be with pictures, all should be archived in tar.gz file as example attached.
- 2) Go to Mosaic admin interface <http://ip/apps/data/mosaic20/admin/>
- 3) Click on the settings button on the top right corner and choose **Extensions** menu.

- 4) Go to **Themes** tab and click **Add theme** button

- 5) Choose name of the theme and archive with the theme, click on **Save** button

A screenshot of the Mosaic admin interface showing the 'Extensions' window with the 'Themes' tab selected. The form is for creating a new theme. It has two input fields: 'Name:' with the value 'My theme' and 'tar.gz archive:' with the value 'theme.tar.gz'. Below the 'tar.gz archive:' field, there is a 'Choose File' button and a note: 'Required. The value must be .tar.gz archive.' At the bottom right, there are 'Cancel' and 'Save' buttons.

6) In the regular Mosaic view you can choose this theme on the left side
