

# Re:ACTOR

«Swiss knife» for every EnOcean installation

## All-in-one

All-in-one controller provides a possibility to complete the installation with only one single device

## Solve it

You can solve potentially any task which can be imagined, thanks to freely programmable and extendable design

## Extend it

In addition to **37** baseboard I/O ports, you can extend it with a line of external I/O devices based on open protocols

## Speak all languages

Speak in all languages at the same time – **EnOcean, KNX/EIB, Modbus, BACnet, DMX, GSM** and more

## Cloud it

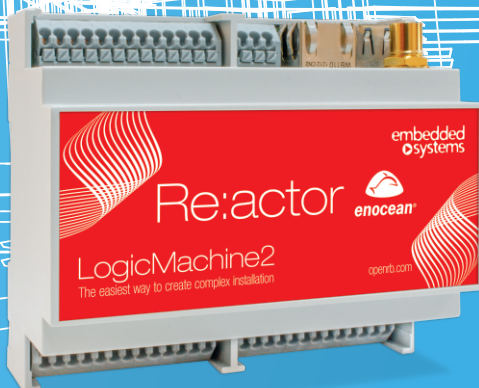

All of your devices can find each other and transparently exchange information

## Log, Trend and Export it

Thanks to **4GB** built-in memory, the device can store logs for more than 20 years and export them to external servers

## Visualize it

Display current status and control your installation from a Smartphone, Tablet or PC
